An ISO 26262 functional safety assessment makes a judgement about the safety of the system based on a process judgment and a product judgement. Novotis use a SPICE-like assessment approach for ISO 26262 to judge that a system has been developed with safe and mature processes. This type of assessment can be offered separately from a full functional safety assessment.

SPICE and ISO 26262 Assessment - Novotis
ISO 26262 addresses the needs for an automotive-specific international standard that focuses on safety critical components. ISO 26262 is a derivative of IEC 61508, the generic functional safety standard for electrical and electronic (E/E) systems. This paper covers key components of ISO 26262, and qualification of hardware and software.
