The requirements for UWMPs are found in two sections of California Water Code, §10610-10656 and §10608. Every urban water supplier that either provides over 3,000 acre-feet of water annually, or serves more than 3,000 urban connections is required to submit an UWMP. Within UWMPs, urban water suppliers must:

Urban Water Management Plans

Data requirements for planning a town is generally same for most of the areas. The basic requirements include the below mentioned points. The data collected helps a town planner to take decisions and plan for the requirement by people who will be living in that area.

Data requirements for planning a town

Integrated modeling in urban hydrology: reviewing the role of monitoring technology in overcoming the issue of 'big data' requirements. Michael G. Hutchins. Corresponding Author. E-mail address: mihu@ceh.ac.uk.
