Hashim Hashim, Paul Abrams, Transrectal Ultrasound Scan and Biopsy of the Prostate, The Handbook of Office Urological Procedures, 10.1007/978-1-84628-706-0, (106-112), (2008). Crossref A.J.C. FIGUEIREDO, K. SEENI, K.M. ANSON, A.J.L. FURTADO, R.A. MILLER, Are transrectal ultrasonically guided biopsies required for the accurate diagnosis of carcinoma of the prostate?

Transrectal ultrasound in the diagnosis of prostate cancer ...

Transrectal ultrasound scan (TRUSS) and prostate biopsy (PBx) are mainly used for the diagnosis of prostate cancer (CaP) in patients with elevated prostate-specific antigen (PSA) levels and/or abnormal digital rectal examinations. TRUSS is used to image the prostate and to aid in guiding the biopsy needle.

Transrectal Ultrasound Scan and Biopsy of the Prostate ...

Transrectal ultrasound-guided (TRUS) biopsy. This is the most common type of prostate biopsy. An ultrasound probe is put into your rectum to create a scan (picture) of your prostate. Your doctor takes several small biopsies (tissue samples) using a needle which goes next to the probe.

Early Pregnancy Diagnosis in Cattle by Means of ...

Objective To study the discriminative value of the amount of colour flow on Doppler ultrasound within the peripheral zone of the prostate. One-hundred and twenty three men were studied using a 7 MHz transrectal probe, and 274 guided biopsies were undertaken. With each biopsy histological outcome was correlated with the grade of colour flow on ultrasound hard copy images.

The diagnostic value of colour Doppler flow in the ...

Results. The prostate volume measured by multiparametric magnetic resonance imaging was 18-157cm 3 (mean of 49.9cm 3) and by transrectal ultrasound, 22-165cm 3 (mean of 54.9cm 3); the surgical specimen weight was 20-154g (mean of 48.6g), with no statistical differences.Based on the values obtained from imaging examinations, the prostate volume obtained was very close to the real prostatic ...
