Design Standards and Guidelines | Engineering | MBTA

The Guidelines address design philosophy, program and functional criteria, and specific planning issues related to passenger rail stations. Standards, codes and other requirements may be referenced, but are not included on this website, and should be obtained and taken into consideration during the design and construction phases of project development. The Station Program and Planning Guidelines cover the following topics:

Station Planning Guidelines - Great American Stations

The Design Criteria Manual is for use by Sound Transit engineering personnel and design consultants. It provides design policies and technical guidance for developing the design of new Link Light Rail systems and improvements to the existing Link Light Rail system in Pierce, Snohomish, and King Counties.

Design Criteria Manual | Sound Transit - Link light rail

This guidance document is the vehicle for Network Rail in defining a station design policy for new and existing station buildings. It reaffirms a commitment to an architecture that will reflect the synthesis of 'Firmness, Commodity and Delight'¹.

Station design principles for Network Rail

The planning and design of a new station or renovation to an existing station can involve a number of complex issues that need to be carefully coordinated. They include determining the ridership, funding, ownership, operations, programming, design, construction, and implementation of the project.

Amtrak Station Program and Planning Guidelines

This document sets out what the principles are, why they matter, what they apply to and how they will benefit the Network Rail estate. Guidance on sustainability assessment of projects. Design guidance concerning escalators. Design principles and high level guidance on the design of new and existing stations.

Buildings and architecture design guidance - Network Rail

that govern station design. So a clear "wayfinding" strategy is required to "make sense of" the circulation pattern. Signage is a key element to assist commuters in the station environment. This manual is intended to provide guidance to those who are preparing tender documents for the provision of signs at stations within the Queensland Rail City Network.

Rail Stations Signage Manual December 2016

Network Rail's Principles of Good Design published in 2018 help in delivering these national objectives and guiding its ambitions, culture and projects. The principles promote a consistent standard of high-quality design across Network Rail's assets and operations, focussed on putting passengers first.

Re-Imagining Railway Stations - RIBA Competitions

21.2.1.1 Urban Design Principles. Each rail station forms part of a rail network and part of a community. The design principles in this chapter provide a balance between the need for the station to be a readily identifiable part of a passenger transport network and the local community.
